Lebanon is facing more pressure than ever, and the COVID-19 pandemic is only increasing the economic devastation.

Here are some figures:

- The cost of food has risen 441% since last year,
- Prices for water, electricity, gas and other fuels rose 23.3%,
- 80% decrease in the value of the Lebanese Lira.

What do these figures mean?

**Half of Lebanon's population is now under the poverty line, and they need the help of the United States.**
